

Business and Marketing Education/Teaching B.S. Degree

Are you interested in making a difference in the lives of those around you? Do you enjoy motivating others to succeed? Are you challenged to dedicate your life in service to those who may need a guiding hand? Do you believe that opportunities exist for worthwhile careers in business if young people have the skills to compete for the jobs? If you respond positively to these questions, you might have discovered that your niche can be found in teaching business and marketing courses!

Considering Career Opportunities

A Bachelor of Science Degree in Business and Marketing Education provides you with certification to teach comprehensive business courses in grades 5 through 12. The job outlook for teaching careers in middle and secondary schools is very good. Currently, many teachers are reaching retirement age, and school systems are actively seeking qualified business education teachers. Many students also pursue graduate study or field experience that may qualify them to teach in federally supported vocational business education programs and community college programs.

Getting Started for Success

In addition to general education requirements and business core requirements, business and marketing education majors take a variety of skills, marketing, and related business courses. This background helps ensure your success as a teacher and helps prepare you to enhance your career through the Master's degree. All courses are taught by experienced, knowledgeable faculty in a small classroom environment. Learning is viewed as a hands on process as skills are developed through practical business applications.

Staying the Course

Students are encouraged to interact with faculty both in and out of the classroom. Faculty serve as advisors to students in the Business and Marketing Education program, and graduates of these programs have rated these services as very helpful. You may also choose to participate in Phi Beta Lambda, an active business student organization, and Pi Omega Pi, an honorary business education group. Throughout your program, you will find faculty members who are accessible and willing to help, computer labs that are state-of-the-art, and activities such as the College to Careers Conference that are structured to provide additional professional experiences outside of the traditional classroom.
