School of Business
College of Business & Technology (2017-18)

General Business

B.B.A. Degree

Corporate Communication and Technology

The General Business major provides students with a learning experience that will prepare them to begin a career in business and convince them that this is the first step in a lifelong educational process. We will provide the know-how needed in a growing company or for starting a business. The general business major develops broad capabilities in several areas of business: marketing, management, international business, finance, and information systems. The flexibility of the General Business program and student-centered faculty enables students to customize an academic program to fit their needs.

Student Organizations, Co-operative Education, and Internships

Successful careers in business administration necessitate highly developed personal skills. An analytical mind, able to quickly assess large amounts of information and data, is very important, as is the ability to consider and evaluate the interrelationships of numerous factors. Our graduates must also be able to communicate clearly and persuasively. Other competencies critical for managerial success include leadership, self-confidence, initiative, motivation, decisiveness, flexibility, sound business judgment, and determination. Students gain these competencies both in the classroom and in real-world settings. Membership in student clubs and professional organizations and participation in the co-op programs are integral parts of the General Business program and complement academic work.

Throughout your program, you will find faculty members who are accessible and willing to help, computer labs that are state-of-the-art, and activities such as the College to Careers Conference that are structured to provide additional professional experiences outside of the traditional classroom.
